👤 PROFILE

Experienced DevOps Engineer with 8+ years of hands-on expertise in AWS, Kubernetes, and CI/CD automation. Successfully designed and deployed enterprise-scale infrastructure, optimizing deployment processes, reducing infrastructure costs, and enabling frequent releases. Proven ability to automate complex operational tasks and lead cross-functional teams. Committed to driving continuous improvement and operational excellence.

🎓 EDUCATION

Bachelor of Engineering | Electronics and Communication Engineering
RIT College, Rajapalayam

👛 PROFESSIONAL EXPERIENCE

Deloitte

Senior DevOps Engineer

05/2022 – Present

Client: DEP

- Provisioned and managed production-grade Kubernetes clusters across Dev, Stage, and Prod using GitOps, including KMS setup.
- Managed and automated GitHub infrastructure across 10+ organizations using Pulumi, leveraging YAML descriptors for team creation, repository access controls, CODEOWNERS configuration.
- Integrated Datadog APM, dashboards, and log management across platform applications; combined Prometheus and Grafana with Airflow for end-to-end observability across Kubernetes clusters.
- Set up automated monitoring and alerting for API Gateway availability and SSL expiry using Uptime Kuma, reducing incident detection time.
- Deployed and managed Apache Airflow across test, staging, and production clusters, resolving DAG failures (Fernet key, Doppler PAT token) and configuring log persistence and Doppler secrets for operational reliability.
- Built and maintained GitHub Actions workflows for onboarding automation, Pulumi refresh scheduling (cron), unit test execution, lint checks, and GHCR-to-JFrog artifact migration.
- Created automated cleanup scripts to decommission test, staging, and production environments by removing bulk snapshots and volumes, reducing infrastructure costs by 30%.

CSS CORP

DevOps engineer

10/2019 – 08/2022

Client: Nokia

- Managing day-to-day activity of the cloud environment, supporting development teams with their requirements
- Automated build and deployment pipelines using Jenkins, Docker, and JFrog Artifactory, managing artifact promotion across Dev, QA, and Production environments.
- Provisioned and managed AWS infrastructure (EC2, VPC, IAM, S3, ELB, CloudFormation, Lambda) using Terraform modules and Ansible for configuration management.
- Managed containerized applications on Kubernetes, including Pod deployments, ConfigMaps, Services, and Cert-Manager for automated SSL certificate renewal.

TECHNICAL SKILLS

Operating Systems

Linux, Windows, Mac

Version Control Tool & Build software

GIT, PIP

Continuous integration tool

Jenkins, AWS code build

IT Infrastructure Automation

Ansible, Terraform, Pulumi, Apache Airflow

Container Orchestration Tools

Docker, Kubernetes

Scripting Languages

Shell scripting, python

Clouds

AWS, GCP

Monitoring Tool

Prometheus, Grafana, Splunk, Datadog

AWARDS & RECOGNITION

Applause & Outstanding award

Leadership management

Received the "Applause" & "Outstanding" award from Leadership management

Client appreciation

Achieved good feedback from client for automating their infrastructure level task.

Appreciation

US folks

Received appreciation from US folks for automating their manual tasks.

- Monitored and maintained production RHEL servers — CPU, memory, disk utilization, log analysis — and managed Splunk for centralized log management and user administration.

Rakuten India

DevOps Engineer

04/2021 – 05/2022

Client: Rakuten-CDN, Rakuten Media Service

- Led a small DevOps team, coordinating with developers and product support to manage releases, resolve build issues, and execute weekly and on-call production deployments.
- Built and maintained CI/CD pipelines using Jenkins (Groovy), GitHub, and JFrog, implementing Blue/Green deployment strategy for zero-downtime production releases.
- Deployed microservices on Kubernetes with Docker, managing deployments, scaling, and troubleshooting across sandbox, staging, and production environments.
- Monitored build health and application performance using Jenkins and CloudWatch, proactively identifying and resolving deployment failures and infrastructure issues.
- Managed AWS cloud infrastructure including EC2, S3, IAM, CloudWatch, Route53, and Lambda, with automated AMI backups of critical instances for disaster recovery.

SBA Info Solutions

Engineer

10/2018 – 04/2021

- Familiar with all phases of Software Development Life Cycle and Software Test Life Cycle — gained understanding of planning, design, development, testing, deployment, and maintenance processes.
- Supported AWS infrastructure management — provisioned EC2 instances, created and attached EBS volumes, and configured EFS file systems for shared storage requirements across projects.
- Maintained and upgraded EC2 instances — performed maintenance activities, system updates, and configuration changes according to project requirements; ensured reliability and performance of deployed instances.
- Maintained Linux production servers (RHEL, SUSE, Ubuntu) performed routine housekeeping, troubleshooting, and log analysis; assisted in monitoring 24x7 uptime and resolving critical issues.
- Configured and deployed web servers — installed and set up Apache and Tomcat web servers and MySQL databases; configured SSL certificates (EV, wildcard) for multiple domains.

- Assisted with AWS cloud migration — supported VMIE services for data center to AWS EC2 migration activities; collaborated with senior engineers on infrastructure transition.

TRAININGS & CERTIFICATIONS

- AWS Certified Solutions Architect-Associate
- Certified Kubernetes Administrator
- Terraform Certified Associate
